Dear Grand Design RV Owner:

This notice is sent to you in accordance with the requirements of the *Canadian Motor Vehicle Safety Act*. This is to inform you that your vehicle may contain a defect that could affect the safety of a person.

Grand Design RV has determined a safety defect exists in certain **2021** through **2024 Grand Design Momentum** and **Solitude** fifth wheel vehicles equipped with CURT by Lippert Components 7k & 8k axles.

! IMPORTANT !

- Your vehicle falls within the recall population.
- You should immediately schedule an appointment with your dealer to have your vehicle repaired.

Why is a recall being conducted?

On certain RV trailers, the U-bolts that attach the axles to the suspension may not be properly tightened. As a result, an axle could slide back on the spring. This could cause poor handling and lead to a loss of control and increase the risk of crash.

What are we doing about the problem?

Grand Design RV will notify owners by mail and advise you take your trailer to a dealership to inspect the leaf springs. They will be repaired or replaced, as necessary. If repair or replacement is needed, Grand Design will supply to your dealer the necessary items to complete the repair or replace the faulty product. Time for inspection is no more than 1 hour. These repairs will be done free of charge.

What should you do?
